

SYSTEM INTEGRATION JUST GOT EASIER

Win more jobs while reducing your time and costs with D-Tools System Integrator 2016 (SI 2016). SI 2016 is a fully integrated software package that ties together the entire system integration process into one complete solution. SI 2016 enables commercial and residential system integrators to increase productivity and efficiency by bringing together project estimation, system design, and project management into a single data-driven process.

D-Tools SI 2016 is designed to be your platform for growth. This next generation version of our award-winning solution makes it faster and easier than ever to generate fast, accurate project estimates and proposals, detailed system designs and client documentation through a single data-driven process.

Our solution reduces time, eliminates errors, and ultimately produces better bottom line results. Whether you are a business owner, sales professional, project manager, designer, engineer or installer - SI 2016 can have a dramatic impact on your business efficiency and bottom line.

Estimate

- Quickly produce powerful presentation documents, fully customizable to your look and feel
- Develop fast, accurate data-driven proposals
- Accessorize products and build pre-engineered packages
- Win more projects with the competitive advantage of fast, accurate quotes

Design

- Easily complete detailed system design drawings in minutes
- Work natively in Visio, AutoCAD*, or both
- Instantly create floor plans, racks, elevations, line and schematic drawings in Visio
- Create plan views, racks, elevations, and schematics in AutoCAD
- Drawings link directly to client, installation, and management documents
- Includes integrated industry-standard J-STD-710 Visio Shapes and AutoCAD Blocks

Install

- Synchronize product lists, documents, tasks, and drawings
- Generate Work Orders and Service Orders
- Manage project revisions and generate change orders
- Manage resources and schedule tasks in the field from any mobile-enabled device
- Generate management reports such as purchase order requests, checklists, labor and profit reports
- Create full installation documents and generate custom reports based on project information
- Automatically generate wire schedules, wire labels, and installation reports

SYSTEM INTEGRATION JUST GOT EASIER

D-Tools data-driven process provides users with up-to-date and detailed product information, in a format that can be utilized in a cross-functional capacity for maximum workflow efficiency, creating an integrated end-to-end solution that improves all areas of an integrator's business – estimation, system design, and project management.

Sell the Job

SI 2016 makes it easy for you to generate fast, accurate, project proposals leveraging D-Tools' data-driven process. Powerful data management tools make it easy to build custom product catalogs. Import your existing product data (Excel and .csv files) or download from our extensive, cloud-based library of AV, security, and networking products from leading manufacturers.

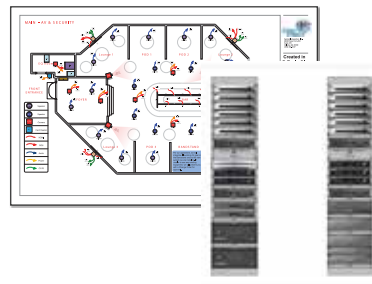

- **Develop fast, accurate, data-driven proposals**
Create fast, accurate professional looking proposals from your product catalog. Quickly specify equipment to locations. Choose from numerous templates or custom create your own.
- **Automatically update and adjust proposal elements**
Accessorize products and build packages with estimated labor calculations for an accurate installed price. Change labor or equipment pricing for competitive bids quickly and easily.

Design the Job

SI 2016 gives you the power to accurately design systems by leveraging the industry standards for drawing tools: Visio and AutoCAD. Quickly and easily create detailed Line, Plan, Elevation, and Schematic drawings.

- **Create detailed designs and as-built drawings faster**
Work natively in either AutoCAD, Visio, or both for clear communication with clients, project managers, installers, and other trades.
- **Easily configure your product catalog**
Download from our Data Library, create products from scratch, or import spreadsheets.
- **Provide detailed system design as part of your proposals**
Present your client with a visual representation of their finished system in your proposal. Changes made to the drawing and proposals are synced making revisions easy and error free.

Deliver the Job From Any Location

Mobile Connectivity allows users to easily communicate with teams in the field and back via any mobile device. SI 2016's project scheduling, resource management, and powerful reporting capabilities help ensure that you deliver the job on-time and to budget.

- **Mobile Connectivity**
Schedule installation and service tasks to your techs and they can manage and report status from any mobile device for accurate time and install tracking.
- **Detailed Reporting options**
Generate reports to track the progress of the install and keep an accurate account of products, time, and labor costs.

Recommended System Requirements

Computer and Processor	Intel Core Duo, 2.0 GHz greater
Memory	4 GB of RAM or more
Hard Disk	10 GB of available space or more
Drive	DVD-ROM (optional)
Display	Dual XGA (1024 x 768) or higher-resolution monitor
Operating System	Microsoft Windows® 7 or higher
Other	AutoCAD functionality requires AutoCAD (Full version 2010 and up), sold separately. Outlook 2010 functionality requires Microsoft Outlook 2007 and up, sold separately.
